DETAILED ACTION

1. Claims 1-20 are in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Worth et al.

Worth et al discloses a method for controlling an engine of a marine propulsion system including the steps of sensing an impending shift event from a neutral gear position; determining a desired engine operating speed during the shift event and changing the engine torque , and indirectly, the engine speed. The change in engine torque is created by supplying additional air, which would be controlled by an air control valve, of necessity.

Allowable Subject Matter

4. Claims 3-11 and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 18-20 are allowed.
